Experience

Head of IT — Institut français de RDC, Kinshasa

April 2025 – Present

- Designed and built the unified IF DRC web portal covering four branches: architecture, front-end and back-end development, production rollout
- Led the institution's digital transformation and owned technical decision-making
- Managed vendor relationships and scoped requirements
- Run infrastructure, Microsoft 365 and Entra ID administration, data security and the business continuity plan
- Trained staff on digital tools

Program Coordinator — Embassy of France in the DRC, Goma

FEF Création — October 2023 – December 2024

- Selected social-impact projects in the Cultural and Creative Industries: reviewed applications, assessed technical feasibility, made final calls
- Designed and ran an incubation program for cultural entrepreneurs, centered on business models and emerging tech (XR, AI)
- Coordinated [EclosionHack 2024](#), a national hackathon bringing together developers and project leads
- Delivered training sessions on AI tools and digital marketing

Director of Technology — Wito XR Studio, Goma

October 2022 – December 2024

- Led VR/AR application development: set the technical roadmap and prioritized features
- Integrated third-party solutions (authentication, content management, external APIs)
- Administered Linux servers and cloud deployments
- Trained teams on collaborative and AI tools

Country Lead — AR/VR Africa Metathon 2022, Goma

September 2022 – April 2023

Program backed by Meta, Blackrhino VR and IMISI 3D to surface African talent in immersive technologies.

- Organized in-person and virtual hackathons across the DRC
- Supported winners through a three-month MVP development bootcamp
- Built local partnerships and coordinated pre-hackathon training

Full-stack Developer — Find Solution Technology, Goma

June 2023 - Present

- Build and deploy business applications for enterprise clients, from requirements to production
- Develop front-end and back-end features, integrate third-party APIs, design database schemas
- Manage client projects and supervise technical teams to ensure on-time delivery
- Provide technical advice and user support

Full-stack Developer — Skyzone, Horizon Construction, Black Born Community, Bukavu

January 2019 - May 2023

- Full-stack web development (PHP, JavaScript, HTML/CSS, Node.js)
- Integration of online payment systems and APIs
- Database management and performance optimization
- Technical mentoring for junior developers

Software Engineer & Network Administrator — Freelance, Bukavu

March 2017 - August 2022

- Built web applications: institutional sites, lightweight ERPs
- Designed and deployed complete information systems
- Network administration (TCP/IP, VLAN, VPN, PPPoE) and security
